NOTICE TO CONTRACTOR – SUPERPAVE DESIGN LEVEL INFORMATION

Hot-Mix Asphalt (HMA) and Polymer-Modified Asphalt (PMA) constructed according to the Superpave mix-design system are required to attain a Superpave Design Level and are required to use a Performance Graded (PG) binder. The Superpave Design Levels required for this project are listed in Table 1. The required PG binder is indicated for each mix with an "X" in the appropriate box in Table 1.

TABLE 1 – Superpave Design Level and Performance Graded (PG) Binder

Mix Designation	PG Binder		Route 71
	PG 64S-22	PG 64E-22	Design Level
HMA S0.25	X	-	2
HMA S0.375	-	-	-
HMA S0.5	X	-	2
HMA S1	-	-	-
PMA S0.25	-	-	-
PMA S0.375	-	-	-
PMA S0.5	-	-	-
PMA S1	-	-	-

Note: Please note that PMA mix designations typically use PG 64E-22 and HMA mix designations use PG 64S-22
