

**TOWN OF GLASTONBURY
INVITATION TO BID
GL-2017-06
FIBER BACKBONE CABLING PHASE 3
ADDENDUM NO. 1
OCTOBER 3, 2016**

The attention of respondents submitting proposals for the above-referenced project is called to the following Addendum to the specifications. The items set forth herein, whether of omission, addition, substitution or other change, are all to be included in and form a part of the proposed Contract Documents for the work. Respondents shall acknowledge this Addendum in the Proposal Response Page (39).

REVISED PROPOSAL DUE DATE: 10/14/16 @ 11:00 A.M.

Question 1. *How will the fiber cable that routes from Town Hall to Buttonball Lane route under the Rte 17 bridge?*

Answer The State of Connecticut may require that the cable that routes under the Rte. 17 bridge on Hubbard Street be routed through underground conduit where it passes under the bridge. To accommodate this, **the attached proposal response form has been revised** requiring two price options for this fiber segment.

- **Alternate 4a** would route the cable from the Town Hall, 2155 Main Street to the Knox Lane/Hubbard Street fiber enclosure and stop at that point.
- **Alternate 4b** would include the cable routing from the Town Hall, 2155 Main Street to the Glastonbury High School (GHS), 330 Hubbard Street, and route through conduit at the utility pole outside the (GHS) into the Network Operations Center using existing conduits. The Town of Glastonbury will provide a conduit under the bridge to route the cable through.

Both options would still include the necessary cabling to the Knox Lane Housing Authority facility and the Historical Society facility.

Section 1.1.1 specifies that the ten percent (10%) bid bond will be based upon the total amount of the base bid plus alternates. Since Alternate 4 includes two (2) options and the Town would only select one of these, the bid bond shall include the higher of the two options.

END OF ADDENDUM NO. 1 TEXT

| Base Bid: | Lump Sum Total |
|--|-----------------------------------|
| 1. Install Fiber Cable Segment Facilities Barn | \$ _____ |
| 2. Install Fiber Cable Segment WPC | \$ _____ |
