

**TOWN OF NEWTOWN
PURCHASING AGENT**

**REQUEST FOR PROPOSALS
NEWTOWN PUBLIC SCHOOLS
Propane Fuel & Related Auto-gas Dispensing Equipment for busses**

Addendum #1

- The original RFP stated in Section 17.11 –

The successful bidder must be able to supply a MINIMUM 2,000 gallon autogas propane filling station (as pictured) with dispensing equipment at no charge to Newtown Public Schools or All-Star Transportation.

- While this is still the minimum requirement, should it be in the best interest of the Town and the Bidder, for both price and efficiency, a dispensing tank volume of up to, but not to exceed, 30,000 gallons is permitted at this site.
 - The fueling nozzle for the dispenser is a threaded nozzle.
 - The existing mechanics in the pump is a 30 amp, 3 phase breaker.
- Section 8.4 –

The \$5,000 cashier's check is to be made out to "Newtown Public Schools".
