The parties deem the Contract to have been made in the City of Hartford, State of Connecticut. ## **28. BREACH**

- a) If either party breaches the Contract in any respect, the non-breaching party shall provide written notice of the breach to the breaching party by overnight or certified mail, return receipt requested, to the most current address the breaching party has furnished for the purposes of correspondence and afford the breaching party an opportunity to cure within thirty (30) days from the date that the breaching party receives the notice. The Corrective Action Plan shall provide a detailed explanation of the reasons for the cited deficiency(ies), the Contractor’s assessment or diagnosis of the cause, and a specific proposal to cure or resolve the deficiency(ies). The Contractor shall submit the Corrective Action Plan within ten (10) business days following the request for the plan by the State and is subject to approval by the Department or DAS, which approval shall not unreasonably be withheld. Notwithstanding the submission and acceptance of a Corrective Action Plan, Contractor remains responsible for achieving all Performance criteria. The acceptance of a Corrective Action Plan shall not excuse prior substandard Performance, relieve Contractor of its duty to comply with Performance standards, or prohibit the State from pursuing additional remedies or other approaches to correct substandard Performance.
- c) The written notice of the breach may include an effective Termination date. If the identified breach is not cured by the stated Termination date, unless otherwise modified by the non-breaching party in writing prior to such date, no further action shall be required of any party to effect the Termination as of the stated date. If the notice does not set forth an effective Termination date, the non-breaching party shall be required to provide the breaching party no less than twenty four (24) hours written notice prior to terminating the Contract, such notice to be provided in accordance with Section 29(c).
- d) If the Department reasonably and in good faith determines the Contractor has not Performed in accordance with the Contract, the State may withhold payment in whole or in part in an amount reasonably related to the non-performance pending resolution of the Performance issue, provided that the State notifies the Contractor in writing prior to the date that the payment would have been due.

The Records are deemed to be the property of the Department and the Contractor shall deliver them to the Department no later than thirty (30) days after the Termination of the Contract or fifteen (15) days after the Contractor receives a written request from the Department for the Records. The Contractor shall deliver those Records that exist in electronic, magnetic or other intangible form in a non-proprietary format, such as, but not limited to, ASCII or .TXT.
- d) Upon receipt of a written notice of Termination from DAS, the Contractor shall cease operations as DAS directs in the notice, and take all actions that are necessary or appropriate, or that DAS may reasonably direct, for the protection, and preservation of the Goods and any other property. Except for any work which DAS directs the Contractor to Perform in the notice prior to the effective date of Termination, and except as otherwise provided in the notice, the Contractor shall terminate or conclude all existing subcontracts and purchase orders and shall not enter into any further subcontracts, purchase orders or commitments.
- e) The Department shall, within forty-five (45) days of the effective date of Termination, reimburse the Contractor for its Performance rendered and accepted by the Department, in addition to all reasonable costs, incurred after Termination in completing those portions of the Performance which the notice required the Contractor to complete. However, the Contractor is not entitled to receive and the Department is not obligated to tender to the Contractor any payments for anticipated or lost profits. Upon request by DAS, the Contractor shall assign to DAS or the Department, or any replacement contractor which DAS or the Department designates, all subcontracts, purchase orders, and other information pertaining to its Performance, and remove from State premises, whether leased or owned, all of Contractor's property, equipment, waste material and rubbish related to its Performance, all as DAS may request.
- f) For breach or violation of any of the provisions in the section concerning Representations and Warranties, the DAS may Terminate the Contract in accordance with its terms and revoke any consents to

assignments given as if the assignments had never been requested or consented to, without liability to the Contractor or Contractor Parties or any third party.

g) Upon Termination of the Contract, all rights and obligations shall be null and void, so that no party shall have any further rights or obligations to any other party, except with respect to the sections which survive Termination. All representations, warranties, agreements and rights of the parties under the Contract shall survive such Termination to the extent not otherwise limited in the Contract and without each one of them having to be specifically mentioned in the Contract.

The Approved Plan will be a non-binding document used solely for generating a price quotation, payment schedule and the basis for developing the associated SOW. Once the price quotation, payment schedule and SOW are deemed acceptable, the Department will issue a Purchase Order for the Deliverables and Services in the associated SOW.

## **B. User Acceptance Test Plan**

The Department and Contractor shall follow the following process for User Acceptance Testing ("UAT"):

1. **UAT Request.** Upon receipt of a request for UAT from Contractor (provided that the timing of the UAT must occur pursuant to the parameters set forth in the Approved Plan unless otherwise agreed by the parties), the Department shall schedule UAT of the System's functional operation in the presence of a qualified Contractor representative who shall exercise the functions of the System. As used below, "External Department" refers to an agency that has a distinct network identify on the interoperable network established by the Contractor as a part of the System (the "Interoperable Network") other than the testing Department. UAT of the System must at a minimum include, reflect or confirm successful operation of the following:

- (i) Inbound Incident Invitation Request from an External Department on the Interoperable Network. An Inbound Incident Invitation Request is a visual and audio request sent by an External Department inviting the subject agency to join an “incident”, where “incident” is defined as a distinct encrypted multimedia collaboration session comprised of an inviting agency and invited agencies that have accepted the inviting agency’s invitation to join the session.
- (ii) Outbound Incident Invitation Request to an External Department on the Interoperable Network. An Outbound Incident Invitation Request is a distinct multimedia collaboration session initiated by the subject agency wherein one or more External Departments are invited by the initiating agency to join the collaboration session and electronically signify acceptance and are joined into the session.
- (iii) Dispatch to dispatch audible voice transmit and receive functions with audible quality tested by message received and message repeated test verification.
- (iv) Dispatch workstation receipt of video from an External Department and viewing of the video and audible description and confirmation of content being viewed
- (v) Dispatch workstation sending of video (if available) to an External Department with verbal confirmation of the video content by the recipient.
- (vi) Send and receive text functions between the Department and External Department.
- (vii) Send and receive file and view function between the Department and an External Department.
- (viii) Panic button push and auto-incident creation for each panic button installed
- (ix) If an existing alarm or access control system is to be integrated, auto-incident creation upon an alarm generated from a message event generated by the alarm system or access control system.
- (x) If additional video cameras are to be installed, verification that additional video cameras are working, content is recorded if record and storage functions exist in an existing video management system and that the video views are viewable from an existing video management system workstation.
- (xi) If a third party monitoring service with the System is used, that the third party monitoring system is tested for an External Department with same functional two-way voice, video receive, file receive and text capabilities described above, and if integrated into a monitored alarm or access system, that the System automatically invites the monitoring service to join the incident.
- (xii) If a new video management and surveillance system is installed or implemented, that the following functions of such system are tested:
  - a. Video recording and retrieval functions;
  - b. Each camera that is deployed is sending video, and for cameras with PTZ functions, that pan, tilt and zoom functions are tested from a remote control user interface;
  - c. Each camera location is properly verified against a floor plan, if a floor plan is available
  - d. Access control logs are properly recording access, read and write events;
  - e. User video view access for all authorized deployed cameras may be called and viewed by an operator.
- (xiii) In the case of any regulated voltage wiring or installation or physical integration with fire panel components, that necessary permits and final inspection approvals have been obtained.
- (xiv) Test any and all equipment and functionality described in the SOW.

Upon the Department observing and verifying the UAT, the Department’s Project Administrator shall sign a UAT acceptance form stating that all criterion are satisfied (“UAT Acceptance Form”) or, if one or more functions are shown to be deficient, Contractor shall create a deficiency report to be signed by the Project Administrator (“UAT

Deficiency Report"). If there is a UAT Deficiency Report, Contractor shall promptly correct such deficiencies in accordance with the Contract. Upon the Contractor correcting such deficiencies it shall notify the Project Administrator in writing and request a re-test of the deficient functions following the procedure above. The Project Administrator shall re-test the functions deemed deficient, not later than ten (10) business days after the request is made. If deemed cured, the Project Administrator shall then sign a UAT Acceptance Form. If not deemed cured, Contractor shall once again create a UAT Deficiency Report, and the above described process will be completed until the deficient functions are deemed cured.

Alternatively, the Department may, if agreed in writing with the Contractor in the SOW, establish a phased UAT process where phases of the System to be implemented under the applicable SOW are to be implemented and tested for Acceptance.

**2. UAT Acceptance – User Training.** The final phase of UAT will be user training in accordance with the applicable SOW. Contractor shall conduct the user training in accordance with the requirements set forth in the Approved Plan and not more than ten (10) days after the Project Administrator signs the UAT Acceptance Form, unless otherwise agreed by the parties. Upon completion of the user training to the satisfaction of the Department, the System shall be deemed fully Accepted. Contractor shall also provide detailed documentations of the System along with technical drawing and work flow diagrams. The Contractor shall provide an electronic copy of all training materials in an electronic, magnetic or other intangible form in a readable non-proprietary format, such as ASCII or .TXT.

**D. Post UAT Acceptance – Periodic Roll-Call Exercises.** After Acceptance, Contractor shall periodically invite Department into a brief "roll-call" exercise testing interoperable functions. The roll-call is an interoperable session initiated by Contractor's support center where the Department is invited along with a group of other available agencies into a multi-agency interoperable communications and media sharing session where basic System functions are tested by participants to validate functions are fully operable and reinforce basic user training. This shall occur not less frequently than monthly for three (3) months. Thereafter, Department may initiate exercise incidents as frequently as once per month through Contractor's online roll call point of presence at a time mutually agreed upon and at no charge as part of the services included in the Network Access and Software Maintenance Fees.
