The following are answers to submitted questions for clarification:

1. Q: On MEP-210G and MEP-200W, there are notes to jet clean and videoscope all existing remaining waste piping inside kitchen up to sanitary manhole located outside. At the pre-bid, it was stated that the new piping was to be cleaned and videoscoped up to outside grease separators. Not the existing. Please clarify.

A: All existing remaining grease waste piping that will be part of the completed piping system up to the grease tank outside must be video-scoped and jet cleaned.

2. Q: There is a note on A-100G which states ceiling tiles with sprinkler heads should be replaced when new ceiling is installed. New sprinkler heads must be installed when ceiling is replaced. How many sprinkler heads are to be replaced with new?

A: Assume 20 sprinkler heads will need to be replaced. Please provide a UNIT PRICE per head above or below the allowance of 20 heads. Include draining and recharging of the sprinkler system as required by the AHJ.
